

Q EIGHTY UNITED GENERAL TRADING & CONT. Co. W.L.L
شركة كيوإيتي المشتركة للتجارة العامة و المقاولات ذ.م.م

WHO WE ARE?

BEGINNING

Q80 began its journey in 1982 with Progress & Innovation as our most important products. Today, in the Middle East, we have emerged to be a market leader in the field of Industrial Electrical & Electronic Spares.

The company's major areas of activity are Trading and Distribution of Industrial Electronic, Electrical and Mechanical Components, Safety Products, Test Measurement Equipment, Generating Sets, Electrical Tapes, L.V./H.V. Joints, Cable Ties, Cable Accessories, Calibration Equipments, Safety Tools etc.

PROGRESS

Our Sales outlets are available in Kuwait, Erbil, Baghdad, Basra, Kirkuk, Bahrain, Qatar and Dubai. Our existing workshop remains specialized in calibration facility to keep your inspection and measurement equipment in top working order. With the backing of our friendly and motivated team, Q80 has primarily focused on efficient & speedy services aiming to satisfy every customer's needs. Through the years, we have established our counterparts within the Middle East.

GEOGRAPHICAL LOCATION

It is our ultimate goal to expand our operations and apply the same principles Q80 follows for more than 3 decades in the business. We have established our counterparts in the Middle East, Q80 Company in Erbil, Tech-Equipments in Baghdad, Basra and Kirkuk, Iraq, Metek in Bahrain and Qatar and Kaltronix General Trading in Dubai, UAE.

We follow a well established goals bonded on the same principle Q80 upholds throughout the years and have made us one of the fastest growing Trading companies in the Middle East. We maintain our network channels covering major market places ensuring the saturation in distribution and presence as demands grow faster.

STANDARDS

All our marketed products meet the highest standards for **Quality, Reliability & Safety**. The brands we carry are Premier and Trendsetters in our Industry, thus providing a complete service solution to meet your Electrical Test Measurement needs.

MARKETING STRATEGY

The company is heading towards the demand of the times. The brand management are carefully marketed from print ads, trade show partaking, social media & Search Engine Optimization (SEO), point of sale, promotions, digital marketing, to Free In-depth product training. Ultimately, the company's strategies aim to make our products and services within the accessibility of our consumers and ensure our after sales services.

OUR PRINCIPLES

Our VISION

Q80's vision is to pave the way in providing incomparable service and unrivaled first-class brands to our consumers, thus, emerging as the market leader in the distribution of Electrical and Electronic Spares across the Middle East Region.

Our MISSION

Q80's mission is to enhance its performance by recognizing and understanding customer needs and providing them with the best resources and services on time. We will make this mission a reality through a professionally qualified, committed, and motivated team who are creative, innovative and providers of quality solutions.

Q80 therefore, continues to march ahead in maintaining its healthy growth and dictating its commitment towards continual improvement of customer services to achieve the sole objective of its single purpose:
QUALITY, SERVICE PAR EXCELLENCE

CERTIFICATION

Q80 is proud to announce that we are
ISO 9001:2008 CERTIFIED

OUR LEADER

Spearheading the brilliant team of the men and women of Q80 United is both a huge privilege and an enormous pressure to be bestowed upon. Nonetheless, I am lucky and proud at how the company has achieved its current market position and how far it has gone since it started in 1982 in the industry.

Ultimately our goal is to expand our operations and apply the same principles Q80 follows in its 30 years in the business. I am very pleased to have established our counterpart in the Region of Iraq, the Q80 in Erbil, along with maintaining our offices in Dubai, UAE as Kaltronix General Trading Company and in the US as Q8 America. All entities draw us in realizing our company's mission that is to ensure quality and excellent service to our customers.

The world-class brands that we represent in the field of Electrical and Electronic Spares certainly put us as the market leader in Kuwait. We believe to maintain our position to market ONLY the best and most demanded brands in the industry. Our brands possess the degree of excellence each consumer requires, which are tap by competent personnel to provide training and guidance to our end-users. Q80 along with all the esteemed brands that we sell never stop to progress and offer innovation to our consumers that they deserve.

We commit ourselves to uphold our vision to give QUALITY, SERVICE PAR EXCELLENCE in every step of the way to the best interest of our valued customers.

Eng. Hazem H. Kal
CEO

Q80 BRANDS:

Megger

For over 100 years, Megger has been the premier provider of electric test equipment and measuring instruments for electrical power applications. The trademark was first registered in May 1903 and is jealously guarded by the company. Although we're best known for our world famous range of insulation testers, Megger provides a full service solution to meet your electrical test and measurement needs. Our products provide testing solutions in the most critical maintenance areas including cable fault locating, protective relay testing, and power quality testing. With such a diverse product offering, we are the single source for electrical test and

Telecommunications/Data Communications

sebaKMT

SEBAKMT is the worldwide leading company for the development and manufacture of measurement equipment for diagnosis of the state of a network and for fault location.

Power Networks

We concentrate on four areas: diagnosis of the state of a network, cable fault locating, leak detection and line locating. We are thus in the position to offer high performance in each of these areas.

Power Cable/Fault Location	Leak Location on Pipelines
Power Cable/Test and Diagnosis	Cable and Pipeline Location
Power Cable/Cable Selection	CCTV Inspection
Telecommunication Cable	

Water Leak Detection

Zone measurement / Monitoring

Zone measurements in a drinking water network make it possible for losses to be quantified. In this process, pressure/flow measurements and level/frequency measurements are used to determine areas in which leaks have occurred.

Pre-location

The pre-location or circling in on the water leak is done by listening to directly accessible contact points, such as hydrants or valves. Pre-locating leaks works on the principle of "the louder, the closer" and "the quieter, the further away". After the zone measurements, with pre-location the possible location of the leak is narrowed down.

Fluke Corporation is the world leader in the manufacture, distribution and service of electronic test and tools and software. Founded in 1948, Fluke has helped grow a unique technology market, providing testing and troubleshooting capabilities. From industrial electronic installation, maintenance and service to precision measurement and quality control, Fluke keeps business and industry around the globe up and running, helping profes-

— Calibration

Fluke Calibration is a leader in precision instrument calibration and metrology hardware and software for electrical, temperature, pressure, flow, and RF measurements. Calibration instruments and software from Fluke Calibration are found in calibration facilities around the world, including National Metrology Institutes, that demand the highest levels of performance and reliability for their calibration equipment, backed by state-of-the-art metrology and uncompromising support. They are relied on by quality engineers, calibration technicians, and metrologists to instill confidence in the measurements that are critical to their organizations for quality, safety, reliability, and cost.

A Fluke Company

A world leader in temperature calibration products and services, makes everything you need for calibrating thermometers including SPRTs, PRTs, thermistors, and thermocouples. The temperature baths and dry-wells offer unmatched stability and our primary standards are used in metrology labs around the world. For precision thermometry, HS thermometer readouts and probes are exceptionally accurate and easy to use.

DH Instruments, Inc. (DHI) was founded in 1980 with one objective, to provide superior calibration solutions through innovative technology, first rate service and uncompromising metrological integrity. For most of the 1980s, this objective was pursued through the full service distribution of an outstanding line of pressure calibration products manufactured by Desgranges et Huot, Paris, France. In the late 1980s, building on the resources of a full service distributor and drawing on more than 50 years of broad based management experience in high end pressure metrology, DHI began the in-house development and production of its own unique pressure products. In 1992, the company diversified into flow metrology introducing a revolutionary low gas flow calibration system.
